Abstract—This report presents the fourth milestone of NSU ClubHub, a centralized club management portal for North South University. This update completes the Club Admin portal (ADM-01–ADM-08), the Super Admin portal (SUP-01–SUP-05), and introduces a redesigned login page with a demo role-selector for instant three-role previewing without real authentication. All features operate on structured frontend mock data as the system prepares for backend integration.

TABLE I
CHANGES FROM UPDATE 3 TO UPDATE 4

Feature	Update 3	Update 4
Login Page	Credential form	+ Demo role-selector
Club Admin	ADM-01 only	ADM-01 to ADM-08
Super Admin	Basic stats	SUP-01 to SUP-05
Demo Ready	Student only	All three roles

I. LOGIN PAGE REDESIGN

The login page (AUTH-01) was redesigned to combine a production-ready credential form with a demo role-selector. Three role buttons—Student, Club Admin, and Super Admin—route directly to their respective dashboards without credentials. The asymmetric split-screen layout features a dark left panel with teal glow effects and a white right panel housing the form and selector, eliminating the need for email verification infrastructure while remaining upgrade-ready for NextAuth integration.

II. CLUB ADMIN PORTAL (ADM-01–ADM-08)

The Club Admin portal was expanded from a single dashboard to eight complete screens. ADM-01 provides an overview with stat cards and an activity feed. ADM-02 supports member roster management with role adjustments and removal. ADM-03 offers an event list and creation form with RSVP settings. ADM-04 manages recruitment posts with create, edit, and deactivate actions. ADM-05 handles incoming applications with per-applicant status updates. ADM-06 presents visual analytics for member growth, event attendance, and recruitment conversion. ADM-07 supports drafting and publishing club-wide announcements. ADM-08 provides club profile configuration including category, cover image, and exec board visibility.

III. SUPER ADMIN PORTAL (SUP-01–SUP-05)

The Super Admin portal was completed with five screens. SUP-01 provides a system-wide dashboard with aggregate stats for clubs, users, recruitments, and events. SUP-02 handles club registration approvals and deactivations. SUP-03 presents a searchable user list supporting role adjustments and account deactivation. SUP-04 delivers platform-wide analytics including monthly active users and engagement trends. SUP-05 enables platform-wide announcements visible to all users across all portals.

IV. PROGRESS COMPARISON

V. LIMITATIONS & NEXT PHASE

The platform relies on frontend-only mock data with no cross-session persistence. The next phase will integrate Neon Postgres via Drizzle ORM, implement NextAuth v5 with NSU email enforcement, and add automated notifications via Resend and React Email. Server-side API routes will replace all mock data, completing the transition to a full-stack production application deployable at North South University.
